**To Whom It May Concern:**

I write this letter of recommendation for DataMed S.r.l. – DataINFOMOBILITY division and their team of engineers and staff because it has been earned.

I would like to thank DataINFOMOBILITY for being one of our most professional and dependable partners in business. We've successfully worked with DataINFOMOBILITY for over 5 years. There are not many companies that we have that solid of a relationship with and it's due to the integrity of everyone at DataINFOMOBILITY and we are happy to recommend them to anyone.

We have been working with them on digital displays installations in Israel, in several locations and projects both big and small. What we know going in is that we will get engineering and system design outputs that are relative to our work environment and products that exceed our expectations in terms of quality, robustness and reliability, since DataINFOMOBILITY engineers have taken the time to understand our business and our requirements. We also rely heavily on DataINFOMOBILITY project management process knowing that we will have one point of contact throughout each project's lifecycle.

DataINFOMOBILITY has always been there to investigate and provide quality products, solutions and services. Their solar powered electronic displays are exceptionally well made; they comply with the most stringent quality and safety requirements of Israel Ministry of Transportation and several hundreds of them have already been installed in the major cities, as well as in smaller towns. We are in the process of installing several hundreds more in the upcoming months.

We see our vendors as an extension of our company, we are partners and could not do the things we do without the things they do.

If you have any questions please call.

Yours Sincerely,

Baruch Gavra  
Marketing Manager
